# Digital Menu Board

Nau developed the media player which operates our system. The system is long-lasting, and its installation is easy. Because Nau's Menu is digital, and not a printout manufactured by any signboard business, the contents can easily be changed.

Nau developed its system for easy updates, and permanent maintenance is included.

POS

Nau Computer's POS uses a self-supporting program. That's why you can trust it.

Digital Signage System

e infoboy

You don't need Computers or DVDs anymore!
Nau developed the media player which operates its system.
Nau can update your advertising messages by internet, anytime, anywhere!

Nau's system operates as soon as the power is turned on
There is no wait for the computer to power up. At the Grand Opening of a store, turn it on like a TV. When you are done, just turn it off! Power on/off is available anytime. Even if it is turned on 24 hours/day, 365 days/year, you will not have a problem.
Nau offers 2 versions of its product:
1. Press the power button, and it plays
2. Press the computer on button, and wait a brief time

Nau's system can play Videos, Images, and MP3s
Any work processed from the computer can be played. It supports any designs for production of videos, pictures, images, etc.

Nau's system can be updated anytime, anywhere
All the players can be updated automatically through internet servers.

Nau offers a variety of models and players: approximately 10 to choose from.
The choices include: a desktop or wall-mountable model, for internet, single table, for your office, and many others. The monitor can be produced for a horizontal or vertical position, as ordered. Wired and wireless internet are both supported. Remote control can be used to control the volume from the front.

Your business logo can be displayed in the space under the monitor.

All Nau's systems are easy to move, and can be installed where it's convenient.
Move it anywhere you like, and just plug in the power. Unlike other wall-mounted products, Nau is not difficult to move. From large shopping malls to small restaurants, it can fit anywhere.

A Headline news messaging system is available.
When connected to the internet, you can display your message through all, or only selected monitors.
You can play the headline news message you select as often as you like. The video clip can be separated by different classes into tree formation (restaurants, beauty salons, retail shops, etc.). The user can access some or all of them. The user can also send urgent messages through the internet immediately.

Maintenance of Nau's system is simple and easy.
Nau has designed, developed, manufactured, and inspected the system and its functioning for 2 years. Since Nau developed the whole system, we know how to fix any problem which could arise. Our service is guaranteed.

POS Systems

Nau's POS software was developed to provide continuous applications, and includes quick and thorough service.
It's easy to install, and comes with guaranteed maintenance.
That's all there is to it.

Credit Card Service

Nau provides a one-stop solution for a variety of businesses at an outstanding low price.

NAU is a genuine Korean word, meaning "to be greater." Providing greater service – that's what NAU Computer POS does.

SQL Server Database

Nau is fast and easy on the POS screen.
It's ALL IN ONE SCREEN!
A one-touch order and payment display, without moving the screen.
Uses stable Microsoft SQL Server Database.
